

Mathematics, Magic and Mystery

Presentations for maths fans of all ages

Burkard Polster and *Marty Ross* bring the fun and the laughter to mathematics. They are available to come to your school, to deliver their mathemagic to your students, and to your staff as professional development.

Groups of all sizes and all ages are catered for. Single presentations are available. Or Burkard and Marty can come for a day, or more, of mathematical mayhem. Rates are negotiable.

Burkard and Marty are Melbourne's tag team of mathematics. They write the Maths Masters column for *The Education Age*. And, for the past 7 years, they have been delivering public lectures for the MAV. Check out all their activities at www.qedcat.com.
